Care and Maintenance

Clean all stains as quickly as possible and use the following cleaning procedures for best results:

- Step 1 Remove any excess spills with a damp cloth. Clean with a mild liquid soap and water mixture. Rinse with clean water and dry.
- Step 2 Use a straight application of concentrated cleaners such as Fantastik® or Formula 409®. Rinse with clean water. Wipe with clean cloth.
- Step 3 For more difficult stains, use a 1:10 mixture of household bleach and water (10% bleach, 90% water). Rinse with clean water and dry. Never use bleach at full strength to clean these materials.

The material must be rinsed with clean water and dried with a clean cloth following cleaner application. Failure to rinse thoroughly with clean water and to pat dry may lead to cleaner buildup and cause surface deterioration (cracking, blisters, peeling, discoloration, etc.).

The use of certain agents can be harmful to the surface appearance and lifespan of the material. Do not use cleaners marked "for hard surfaces only". Indiscriminate use of strong cleaning products can severely damage or discolor the material.

To request additional cleaning and maintenance information, including verification of a disinfectant being tested for use with these materials, please contact CF Stinson at 800.841.6279 or visit cfstinson.com.

This information is not a guarantee and does not relieve the user from the responsibility of proper and safe use of the product and all cleaning agents. The use of certain agents can be harmful to the surface appearance and lifespan of the material. CF Stinson, its agents, and assigns assume no responsibility resulting from the use of such cleaning agents to the vinyl.
