LiquiCell® is standard on all La-Z-Boy Contract Furniture healthcare recliner seats.*

*LiquiCell® is not available on glider recliners, gliders, room savers, Kure, or K-Komfort recliners.

What is **LiquiCell®**?

LiquiCell® is a medical technology that protects skin tissues from being stretched and torn, thereby optimizing blood flow. This ultra-thin cell contains a liquid that is in constant motion allowing the body to glide or float with an object. This means greater long-term comfort due to lessened body aches, pain and fatigue.

👁 **LiquiCell®** provides unsurpassed long-term comfort to improve patient quality of life.

👁 **LiquiCell®** significantly reduces shear and friction.

👁 **LiquiCell®** is an aid in the process of helping prevent pressure ulcers, thereby shortening long-term medical care and lowering costs.

LiquiCell® is designed to protect skin tissues at elbow, ankle, ischial tuberosity, sacral, and lumbar areas for individuals who spend extended time lying down and/or seated, who are experiencing physical discomfort, and who are at risk for pressure ulcer development.
