

*you provide the outstanding care,  
we'll provide the outstanding comfort*

At Knú | La-Z-Boy, we believe comfort is for everyone. Our line of healthcare recliners is designed with a variety of comfort features, such as an infinite position reclining back and a unitized reclining mechanism.

As a patient sits in one of our recliners and opens the footrest, the seat and back move slightly to make the first reclined position relaxing and comfortable. This provides immediate comfort for the patient by eliminating the 'clam shell' effect that occurs when sitting in other recliners.
